NEWSLETTER

*At **DermaFix** we constantly strive to bring you the latest active ingredients for the good health of your skin. With consistent daily care, your skin can fight the ravages of ageing and keep wrinkles at bay. Alleviate stress, wear and tear on your skin by considering the following active high potency ingredients:*

Collagen is the major protein fibre of the dermis and should be the Skin Care Therapists key concern. **Palmitoyl Oligopeptide**, **Palmitoyl Tetrapeptides** are two of the most effective cell regenerating and collagen stimulators to improve on tissue integrity producing greater tensile strength of the dermal matrix. Researchers found that when added to cultures of fibroblasts (key skin cells) **Palmitoyl Pentapeptide** stimulated the synthesis of the key constituents of the skin matrix: collagen, elastin fibres, as well as glycosaminoglycans and glycoproteins. **Pepha® nutrients** facilitate the renewal stimulators - a process which produces visible tightening and smoothing of wrinkles. Advanced ingredients compliment a formulation examples are **Pentapeptides**, **Hexapeptides**, **Coenzyme Q10**, **Vitamin E**, **Hyaluronic Acids**, **Ceramides**, **Retinol**, **Copper** and many more active ingredients give the skin its elegant look and feel.

Stem Cells will be presented from various sources. In contrast to human, plant cells are totipotent. All stem cells, independently of their origin (plant, animal, human) contain specific epigenetic factors whose function is to maintain the self - renewal capacity of stem cells. Protects longevity of skin stem cells, delays senescence of essential cells, combats chronological ageing. Preserves, the youthful look and vitality of the skin.

Vitamin C is a valuable adjunct to any active formulation particularly for hyper-pigmentation also due to the photo protective capabilities and the protection against oxidative stress. **Vitamin C** has been shown to prevent premature ageing in skin, to stimulate collagen production and to diminish the appearance of lines and wrinkles.
